

[Long time no C] We had not been having face-to-face classes for quite some time for non-first year students and had not been seeing each other for long. In the interpretation of this problem, we are to find out the longest duration that we had not seen a “C” from an input line.

Write a Python program to find out the longest duration that we had not seen a “C” or a “c” from an input sentence. If there is really no “C” or “c”, say “Really long time no C”.

Sample input:	Sample output:
aaaaabbbbbbaaaaaabbbbbbaaabbabbbbbbaabbb	Really long time no C
Long time no C	13
This is COMP 1002 for computing.	13
We have COMP 1002 for computing students.	18
